LENY FLOGIO

DEVOPS ENGINEER
CLOUD & PLATFORM ENGINEERING

PROFESSIONAL SUMMARY

Cloud and Platform Engineer with 6+ years of experience in AWS infrastructure, infrastructure as code, CI/CD, platform automation, monitoring, and production operations across banking and enterprise environments. Experienced in writing and modifying Terraform code, implementing infrastructure automation, building and troubleshooting CI/CD pipelines, and independently developing scripts and code. Skilled in infrastructure deployments, production troubleshooting, release and change activities, security remediation, and cloud platform maintenance.

EDUCATION

Bachelor of Science in Information Technology

STI College - Fairview, Q.C.
Jan 2014 - Jun 2018

PROFESSIONAL EXPERIENCE

SENIOR CLOUD PLATFORM ENGINEER

MACQUARIE GROUP | OCT 2024 – APR 2026

- Implemented and validated technical changes across Customer Identity, Access & API Management (CIAM) platforms in UAT, BETA, and PROD, covering configuration, troubleshooting, deployment validation, and production support.
- Developed Sumo Logic lookup tables, log searches, and alerting for the ISAM High Junction Error Rate initiative to improve failure categorization and reduce manual on-call investigation.
- Implemented platform automation and configuration improvements across ISV, LDAP, PAM, SAMLBroker/MGaaS, and ISV Developer Experience, spanning platform, access, and integration components.
- Executed platform release and maintenance activities, including stack rolls, application version upgrades, Linux upgrades, vulnerability remediation, certificate renewals, password rotations, pipeline configuration, and license renewals.
- Wrote and modified Terraform-related configurations and supported pipeline engineering across relevant platform repositories, contributing to infrastructure automation and CI/CD workflows.
- Developed and maintained Confluence deployment guides, implementation runsheets, and on-call knowledge-base content to support repeatable deployments and operational troubleshooting.
- Worked independently on assigned technical deliverables while collaborating with Sydney and Manila engineering teams on implementation, troubleshooting, validation, and production support.
- Presented the AI Accelerator Guide during Quarterly Planning and the Manila AI Workshop, sharing technical guidance and practical AI use cases.

AWS PLATFORM ENGINEER

UNIONDIGITAL BANK | JUNE 2022 - FEB 2024

- Provisioned and maintained AWS platform components supporting application teams and banking workloads.
- Implemented infrastructure and platform automation using Terraform, CloudFormation, IAM, and CI/CD pipelines.
- Executed platform integrations, deployments, monitoring, troubleshooting, and production issue resolution across cross-functional teams.
- Improved monitoring and alerting using CloudWatch rules, alarms, load balancers, and platform health checks.
- Analyzed cloud cost and usage and developed implementation plans with pricing assumptions for optimization initiatives, communicating recommendations to engineering teams.
- Implemented backup and lifecycle controls across EFS, S3, Redshift, RDS, and DynamoDB to support data protection and strengthen operational resilience.
- Contributed to zero-downtime migration and infrastructure modernization activities through technical implementation and validation.
- Created and maintained technical documentation, implementation plans, and cloud best-practice guidance for engineering teams.

AWS CLOUD ENGINEER

TECHNOLOGY ELITE | APR 2021 - JUNE 2022

- Implemented and maintained AWS cloud infrastructure across customer environments, including monitoring, troubleshooting, and operational support.
- Implemented infrastructure-as-code using AWS CloudFormation, CI/CD workflows and related automation practices.
- Administered AWS IAM permissions and access controls, supporting patch automation, access-key rotation, and least-privilege practices.
- Contributed to disaster recovery and business continuity planning with consideration for availability, performance, security, and scalability.
- Investigated infrastructure and production issues and worked with Project Leads and AWS-certified engineers to implement technical resolutions.
- Implemented assigned production changes, validated results, and performed post-change verification against customer requirements.
- Maintained technical documentation and operational procedures to support consistent cloud operations.

PROFESSIONAL EXPERIENCE — CONTINUED

AWS DEVELOPER / LEVEL 4 SUPPORT

DXC TECHNOLOGY | FEB 2020 - MAR 2021

- Provided Level 3/4 technical support for AWS-hosted applications and enterprise customer environments across multiple ANZ accounts.
- Supported Amazon Connect, ServiceNow, and Computer Telephony Integration (CTI) solutions.
- Served as Change Owner for assigned production implementations, coordinating change execution and post-implementation validation.
- Investigated priority incidents, including P1/P2 issues, and worked with engineering teams to troubleshoot and resolve technical problems.
- Maintained Confluence knowledge base articles and ServiceNow incident, request, change, and problem records.

IT SERVICE DESK ANALYST | JUNE 2018 - FEB 2020

- Provided technical support for the Jollibee Foods Corporation account in the Philippines, serving as a primary contact for incident monitoring, ownership, and resolution.
- Troubleshot POS systems and server issues across Jollibee, Burger King, Chowking, Greenwich, and Mang Inasal stores.
- Coordinated with service management teams and end users to resolve technical issues, address user requests, and maintain effective communication throughout incident resolution.

SELECTED PROJECTS

ISAM HIGH JUNCTION ERROR RATE ALERTING

Developed Sumo Logic lookup tables, log searches, and alert rules to improve failure categorization and reduce manual on-call investigation.

ISV DEVELOPER EXPERIENCE

Contributed to platform enhancements involving Terraform pipelines, access policies, and developer enablement to streamline technical workflows across the CIAM environment.

PLATFORM RELEASE & CHANGE DELIVERY

Implemented assigned technical changes involving stack rolls, application upgrades, security remediation, certificate and password rotations, pipeline configuration, deployment validation, and operational documentation.

AMAZON CONNECT MVP BUILDATHON

Contributed to the Manila team for the Agile Service Desk of the Future / Digital Service Desk Asia Migration initiative, developing an Amazon Connect IVR integrated with ServiceNow and CTI. Enabled users to report incidents, check service status, and initiate password resets through automated self-service workflows without agent intervention. The team competed in the Asia-wide Amazon Connect MVP Buildathon.

TECHNICAL SKILLS

CLOUD & AWS:

AWS EC2, Lambda, Elastic Beanstalk, Auto Scaling, S3, EBS, EFS, RDS, Aurora, DynamoDB, VPC, API Gateway, CloudFront, Elastic Load Balancing (ELB), IAM, Secrets Manager, KMS, Systems Manager (SSM), CloudFormation, CloudTrail, CloudWatch (Alarms & Dashboards), QuickSight, AWS Backup, Disaster Recovery, CodeCommit, Amazon Connect, Lex, Athena, EMR, Glue, Redshift, Cost Explorer, AWS Billing & Cost Usage, Hadoop, MapReduce

INFRASTRUCTURE AS CODE & DEVOPS:

Terraform, AWS CloudFormation, Docker, Git, Bitbucket, Bitbucket Pipelines, CI/CD, Artifactory, JFrog, Aqua Security Scanner

MONITORING & OPERATIONS:

Sumo Logic, CloudWatch Alarms & Dashboards, log analysis, alerting, incident troubleshooting, production support, deployment validation, release and change activities

IDENTITY, SECURITY & INTEGRATION:

IAM, OIDC, JWT, LDAP, SAML, ISV API, DexD, CTI, access controls, certificate renewals, vulnerability remediation

SCRIPTING & PROGRAMMING:

Python, JavaScript, Go, Java, C#, Node.js, SQL, REST APIs, ODBC

TOOLS & COLLABORATION:

Jira/Atlassian, Confluence, Slack, ServiceNow, SharePoint, Agile, Scrum, retrospectives

OPERATING SYSTEMS:

Linux — basic operational knowledge
